DIRECTORS' REPORT

The Directors present their report together with the annual financial report for the financial year ended 31 December 2019 and the auditor’s report thereon. In order to comply with the Corporations Act 2001, the Directors report as follows:

Directors

The Directors of the company during or since the end of the financial year are:

Kathryn J McCann (commenced as Chairperson 19 August 2016)
Keith Scott (commenced 1 January 2017)
John Nesbitt (commenced 1 December 2018)
Andrew Flitcroft (commenced 1 August 2015 and ceased on 1 May 2019)
Andrew Gifford (commenced 11 May 2018)
Neal Mullen (commenced 1 May 2019)

Name and qualifications                      Experience and special responsibilities

Kathryn J McCann
B App Sci (Computing Science), MBA, MAICD
- Chair of the Board
- Non-Executive Director
- Member of Board Audit Committee
- Member of Board Risk Committee
- Member of Board Remuneration Committee
Ms McCann has over 30 years’ experiences in the finance and business management industry. She is a director of Astro Japan Property Group Limited and General Reinsurance Life Australia Ltd. She holds a Master of Business Administration degree and held the position of Principal of a major management consulting firm up to 2002. Director since August 2006 and a member of the Board Audit Committee since November 2006. She was appointed as Chair of the Board effective 19 August 2016.

Keith Scott
FAICD, FCII, MA (Cantab)
- Non-Executive Director
- Chair of Board Remuneration Committee
- Member of Board Audit Committee
Mr Scott has over 15 years’ board level experience across the Australian and Asian insurance markets following extensive international executive reinsurance experience with Swiss Re. He was appointed to the Board in January 2017 and also holds the positions of Independent Director at Insurance Manufacturers of Australia Pty Limited and Non Executive Director of Aviva Life Insurance Company Limited (Hong Kong). He is a Fellow of the Australian Institute of Company Directors and a Fellow of the Chartered Insurance Institute, London.

John Nesbitt
FCA, F Fin, GAICD
- Non-Executive Director
- Chair of Board Risk Committee
- Member of Board Remuneration Committee
Mr Nesbitt’s executive experience over a period of 40 years has spanned a diverse range of industries including investment and asset management, banking, superannuation, insurance, property, construction, infrastructure, technology and chartered accounting. He held senior finance and executive roles including positions as CFO and CEO. The last 7 years of his executive career were with Suncorp Group Limited where his final role was CEO of Suncorp Bank which followed a period of 4 years as Group CFO. He was appointed to the Board on 1 December 2018 and is the chair of the Board Audit Committee. Mr Nesbitt concurrently holds directorships at Members Equity Bank Limited, Credit Corp Group Limited and Evolve Housing Limited.

Andrew Flitcroft
ANZIIF (Fellow), CIP
Mr Flitcroft has over 30 years’ experience in the insurance and reinsurance industries. He joined Gen Re in 1996 after an eleven year career in the primary market, and over the course of his twenty years with the company he held various underwriting and leadership positions across both the facultative and treaty units. These roles have included responsibilities for various parts of the business in Australia, New Zealand and the Group’s Asian offices.
DIRECTORS' REPORT (continued)

Name and qualifications | Experience and special responsibilities
---|---
Andrew Gifford  
B.A., JD  
- Managing Director  
Mr Gifford is a member of the Bar of the State of Illinois and is an authorised house counsel in the State of Connecticut. Prior to joining the Gen Re group in 2012, Mr. Gifford was a partner with the law firms Locke Lord Bissell & Liddell LLP and DLA Piper LLP where he handled a wide range of matters, including litigation, for financial and professional services firms. At Gen Re, Mr Gifford has held various roles in the Global Legal Department and is currently Gen Re's Global General Counsel and Corporate Secretary. He is also a director for various Gen Re group entities, including the group holding company General Re Corporation and the group’s largest regulated entity General Reinsurance Corporation, and sits on the group Audit and Risk Committees. Mr. Gifford is a graduate of the University of Michigan Law School where he received a Juris Doctorate degree.

Neal Mullen  
BBus, ANZIIF (Snr Assoc), AAICD  
- Managing Director  
Mr Mullen has over 20 years’ experience in the insurance and reinsurance industries in the UK and Australia. His experience spans multiple lines of business and disciplines including primary and reinsurance portfolio management as well as complex individual risk underwriting roles. During his career he has held a number of leadership positions spanning both Primary Insurance and Reinsurance. He joined Gen Re in 2016 as Casualty Facultative Manager; in this role he was responsible for maintaining and strengthening the Australia and New Zealand Casualty Facultative offering for Gen Re and was appointed Managing Director of General Reinsurance Australia on 1 May 2019.

Meetings of directors

The number of Directors’ meetings (including meetings of committees of Directors) and number of meetings attended by each of the directors of the company during the financial year ended 31 December 2019 are:

Company secretaries

Particulars of the qualifications and experience of each Company Secretary during or since the end of the financial year are set out hereunder:

Scott Unterrheiner  
B.Com, CA,  
Mr Unterrheiner has been employed by Gen Re for 7 years. He is currently the Chief Financial Officer for Australia and New Zealand, and previously held roles as the Asia Pacific Chief Risk Officer, and Finance Manager for Australia and New Zealand. Prior to joining Gen Re he worked in various roles within the financial services industry in both Sydney and London.

Principal activities

The principal activity of the company is reinsurance underwriting.

There has been no significant change in the nature of this activity during the year.
DIRECTORS' REPORT  (continued)

Review of operations

Operating Results
The net profit of the company for the year, after provision for income tax, amounted to $27,089,000 compared with the 2018 profit of $443,000.

Dividends
No dividend was proposed or declared relating to the financial period (2018: $NIL).

State of affairs
In the opinion of the Directors there were no significant changes in the state of affairs of the company that occurred during the financial year under review not otherwise disclosed in this report or the financial statements or notes thereto.

Events subsequent to balance date
There has not arisen in the interval between the end of the financial year and the date of this report any other item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the company, to affect significantly the operations of the company, the results of those operations, or the state of affairs of the company in subsequent financial years.

Indemnification of officers and auditors
The Board of General Re Corporation (incorporated in the USA) has, by resolution, provided indemnification to each of the Directors of the company, as per the By-Laws of General Re Corporation.

Likely developments
There are no future developments in the normal operations of the company that require comment in this report other than the comments made under the Review of Operations. The directors do not consider there are any likely developments which will impact the operations of the company.

Environmental regulation
This company is not subject to significant environmental regulation as the company operates solely in the financial services sector.

Rounding of amounts to nearest thousand dollars
The company is of a kind referred to in ASIC Corporations Instrument 2016/191 dated 24 March 2016, issued by the Australian Securities and Investments Commission, relating to the “rounding off” of amounts in the Directors’ report and financial report. Amounts have been rounded off to the nearest thousand dollars in the Directors’ report and financial report in accordance with that Instrument, unless stated otherwise.

Acknowledgements
The Directors wish to place on record their appreciation of the support given to our company by clients. In addition, the Directors take this opportunity to formally thank management and staff for their efforts throughout the year.

Auditor’s independence declaration
The auditor’s Independence Declaration is contained on page 7.
DIRECTORS' REPORT (continued)

Approval

Signed in accordance with a resolution of the Directors made pursuant to Section 298(2) of the Corporations Act 2001 on 17 March 2020.

On behalf of the Directors:

K. J. McCann  
Chair

N. Mullen  
Managing Director

Sydney, 17 March 2020
Dear Board Members

General Reinsurance Australia Ltd.

In accordance with section 307C of the Corporations Act 2001, I am pleased to provide the following declaration of independence to the directors of General Reinsurance Australia Ltd.

As lead audit partner for the audit of the financial statements of General Reinsurance Australia Ltd. for the financial year ended 31 December 2019, I declare that to the best of my knowledge and belief, there have been no contraventions of:

(i) the auditor independence requirements of the Corporations Act 2001 in relation to the audit; and

(ii) any applicable code of professional conduct in relation to the audit.

Yours faithfully

DELOITTE TOUCHE TOHMATSU

*This Statement of Cash Flows is to be read in conjunction with the notes to and forming part of the financial statements.*
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

1 SUMMARY OF ACCOUNTING POLICIES

Statement of compliance

This general purpose financial report has been prepared in accordance with applicable Australian Accounting Standards and Interpretations, the Corporations Act 2001 and complies with other requirements of the law. Accounting Standards include Australian equivalents to International Financial Reporting Standards (‘A-IFRS’). Compliance with the A-IFRS ensures that the financial statements and notes comply with International Financial Reporting Standards (‘IFRS’).

These financial statements are presented in Australian Dollars ($), which is the company’s functional currency. All financial information presented in Australian Dollars has been rounded to the nearest thousand, except where otherwise indicated.

The financial statements were authorised for issue by the Directors on 17 March 2020.

Basis of preparation

The financial report has been prepared in accordance with the historical cost convention, except for financial assets which are stated at fair value and provisions for outstanding claims and related reinsurance recoveries which have been inflation adjusted and discounted as required by the Accounting Standard AASB 1023 “General Insurance Contracts”.

Prior period reclassifications

Notes within the financial statements required restatement for prior year comparatives (2018), specifically Note 3 Actuarial Assumptions and Methods. This restatement has not resulted in changes in net profit, net assets and net cash flow.

Significant accounting policies

Accounting policies are selected and applied in a manner which ensures that the resulting financial information satisfies the concepts of relevance and reliability, thereby ensuring that the substance of the underlying transactions or other events is reported. There have been no significant changes to accounting policies during the financial year. The following significant accounting policies have been adopted in the preparation and presentation of the financial report:

(a) Outstanding claims

Provision is made for the estimated cost of all unsettled claims. The provision includes an estimate, based on past experience, of the cost of unreported claims and their expected settlement costs. The provision also includes a claims handling expense of 1% of the gross outstanding claims liabilities which is supported by analysis of the current level of the company’s Claims department expenses.

The outstanding claims liability includes a margin that relates to the inherent uncertainty in the central estimate. The margin has been actuarially determined based on past experience and industry practice to ensure realistic provisioning for outstanding claims.

The outstanding claims liability includes the effect of inflation on the ultimate claim amount and is discounted using a risk free rate. The details of discount rates applied is included in Note 3.

(b) Outwards reinsurance

Premiums ceded to reinsurers are recognised as an expense in accordance with the recognition (or earning) pattern of reinsurance services rendered. Accordingly, a portion of outward reinsurance premiums is treated as a prepayment at balance date, where appropriate.

(c) Reinsurance and other recoveries receivable

Reinsurance and other recoveries receivable on paid and outstanding claims are recognised as revenue. Recoveries are measured as the present value of the expected future receipts, calculated on the same basis as the for outstanding claims liability.

(d) Premiums

Inward reinsurance premiums comprise amounts charged to the ceding company, excluding amounts collected on behalf of third parties. The earned portion of premiums received and receivable is recognised as revenue in the Statement of Profit or Loss and Other Comprehensive Income over the period of indemnity. Premiums in relation to unclosed business have been brought to account and are based on historical data.

(e) Unearned premiums

Unearned premiums represents the portion of premiums that relate to the unexpired terms of contracts. The unearned portion of premium is recognised as an unearned premium liability in the Statement of Financial Position.
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

1 SUMMARY OF ACCOUNTING POLICIES (continued)

(f) Liability adequacy
At each reporting date, a liability adequacy test is performed on unearned premium reserves less related deferred acquisition costs to ensure that the carrying value is adequate, using current estimates of future cash flows, taking into account the relevant investment returns. If that assessment shows that the carrying amount of the liabilities is inadequate, any deficiency is recognised by recording an additional liability for claims provisions or a provision for unexpired risks. The provision for unexpired risks is assessed in aggregate for business classes which are managed together.

(g) Investments
Financial assets are classified at fair value through Profit or Loss. Initial recognition and subsequent measurement is at fair value. Unrealised gains and losses on subsequent measurement to fair value are recognised in the Statement of Profit or Loss and Other Comprehensive Income. Fair value is determined as follows:

- Cash and cash equivalents are carried at face value of the amounts deposited or drawn. The carrying amounts of cash and cash equivalents approximate to their fair value. For the purposes of the Statement of Cash Flows, cash and cash equivalents include cash on hand.
- Level 1 fixed interest securities are carried at fair value represented by the quoted market value at balance date.
- Level 2 fixed interest securities are carried at fair value represented by the direct or indirect observable inputs other than level 1 inputs.

(h) Assets backing insurance liabilities
The company has determined that all assets are held to back general insurance liabilities on the basis that all assets of the company are available for the settlement of claims if required.

(i) Depreciation
Depreciation is calculated on a straight line basis so as to write off the net book value of fixed assets over their estimated effective working lives to their estimated residual value. The following estimated useful lives are used in the calculation of depreciation:

<table>
<thead>
<tr>
<th>Asset Type</th>
<th>Useful Life</th>
</tr>
</thead>
<tbody>
<tr>
<td>Furniture and equipment</td>
<td>3 to 5 years</td>
</tr>
<tr>
<td>Leasehold improvements</td>
<td>Lesser of 10 years or term of lease</td>
</tr>
</tbody>
</table>

(j) Deferred acquisition costs
The company adopts the practice of deferring to the following accounting period, expenses and levies directly related to premium income, in the same manner as unearned premium is calculated. These are measured at the lower of cost and recoverable amount.

(k) Foreign currency
Foreign currency transactions are translated to Australian currency at the rates of exchange ruling at the date of the transactions. Amounts receivable and payable in foreign currencies are translated at the rates of exchange ruling at balance date. Exchange differences relating to amounts payable and receivable in foreign currencies are brought to account in the Statement of Profit or Loss and Other Comprehensive Income in the financial year in which the exchange rates change, as exchange gains or losses.

(l) Income tax

Current tax
Current tax is calculated by reference to the amount of income taxes payable or recoverable in respect of the taxable profit or tax loss for the period. It is calculated using tax rates and tax laws that have been enacted or substantively enacted by balance date. Current tax for current and prior periods is recognised as a liability (or asset) to the extent that it is unpaid (or refundable).

Deferred tax
Deferred tax is accounted for using the comprehensive liability method in respect of temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax base of those items. In principle, deferred tax liabilities are recognised for all taxable temporary differences.
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

1 SUMMARY OF ACCOUNTING POLICIES (continued)

(l) Income tax (continued)

Deferred tax (continued)
Deferred tax assets are recognised to the extent that it is probable that sufficient taxable amounts will be available against which deductible temporary differences or unused tax losses and tax offsets can be utilised. However, deferred tax assets and liabilities are not recognised if the temporary differences giving rise to them arise from the initial recognition of assets and liabilities which affects neither taxable income nor accounting profit.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period(s) when the asset and liability giving rise to them are realised or settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by reporting date.

Tax consolidation
The company is a member of a multiple entry consolidated (MEC) group for Australian income tax purposes with the provisional head entity being General Reinsurance Australia Ltd. The consolidated group was formed on 2 August 2016 with an effective date of 1 January 2015. All entities that form part of the MEC group have signed tax funding and tax sharing agreements with the provisional head entity.

The company accounts for its own current and deferred tax amounts. These tax amounts are measured under the ‘Separate taxpayer within group’ approach. This approach adjusts for transactions and events occurring within the tax consolidation group that do not give rise to a tax consequence for the group or that have different tax consequences at the group level.

When recognising deferred taxes in the separate financial statements of each entity in the tax consolidated group, temporary differences are measured by reference to the carrying amounts of assets and liabilities in the entity’s statement of financial position. Deferred taxes are transferred to the head entity only as and when they are utilised by the Provisional Head Company.

Any differences between the amounts assumed and amounts receivable or payable under the tax funding agreement is recognised as a contribution to (or distribution from) commonly controlled tax consolidated entity.

The company operates a Taxation Governance Framework which governs the taxation risk appetite, the associated risks, controls and procedures, and the reporting and oversight of taxation matters for the company. This framework operates across all entities that form part of the MEC group.

(m) Receivables and revenue recognition

Receivables are recognised as follows:
- Reinsurance premium receivables are recognised in accordance with AASB 1023 “General Insurance Contracts”.
- Income receivable on financing and investment activities is accrued using the effective interest method.
- Collectability of receivables is reviewed on an ongoing basis. Debts which are known to be uncollectible are written off.

(n) Accounts payable

These amounts represent liabilities for goods and services provided to the company prior to the end of the financial year and which are unpaid. The amounts are unsecured and are usually paid within thirty days of recognition.

(o) Impairment of financial assets

Financial assets, other than those at fair value through profit or loss, are assessed for indicators of impairment at each balance date. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been impacted. For financial assets carried at amortised cost, the amount of the impairment is the difference between the asset’s carrying amount and the present value of the estimated future cash flows, discounted at the original effective interest rate.

Examples of evidence that may indicate a review of collectability are bankruptcy of counterparties, disputes with counterparties or non-collection for over 180 days.
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

1 SUMMARY OF ACCOUNTING POLICIES (continued)

(p) Provision for employment entitlements

Provisions are recognised when the company has a present obligation, the future sacrifice of economic benefits is probable, and the amount of the provision can be measured reliably. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at balance date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. They are discounted to their present value using a market-determined, risk-adjusted discount rate.

Salaries and annual leave

Liabilities for salaries and annual leave are recognised, and are measured, as the net present value of expected future cash flows in respect of employees’ services up to balance date.

Long service leave

A liability for long service leave is recognised, and is measured, as the present value of expected future payments to be made in respect of services provided by employees up to balance date. Consideration is given to expected future wage and salaries levels, experience of employee departures and periods of service.

(q) Superannuation

The company makes contributions on behalf of employees to their accumulation superannuation funds. The contributions are recognised as an expense over the period of services provided by the employees.

(r) Goods and services tax

Revenues, expenses, assets and liabilities are recognised net of the amount of applicable goods and services tax (GST), except:

(i) where the amount of GST incurred is not recoverable from the taxation authority, it is recognised as part of the acquisition cost of an asset or as part of an item of expense; or

(ii) for receivables and payables which are recognised inclusive of GST.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables. Cash flows are included in the Statement of Cash Flows on a gross basis. The GST component of cash flows arising from investing and financing activities which is recoverable from or payable to the taxation authorities is classified as operating cash flows.

(s) Leases

Policies applicable from 1 January 2019

The company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

Properties Lesser of 10 years or term of lease

If ownership of the leased asset transfers to the company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment.
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

1 SUMMARY OF ACCOUNTING POLICIES (continued)

(s) Leases (continued)

Lease liabilities
At the commencement date of the lease, the company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including insubstance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the company and payments of penalties for terminating the lease, if the lease term reflects the company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Short-term leases and leases of low-value assets
The company applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

Policies applicable prior to 1 January 2019
For the year ended 31 December 2018, the company has operating leases for office space and equipment whereby the lessor retains substantially all the risks and benefits of ownership of the leased items. Under AASB 117, lease payments are recognised on a straight-line basis over the term of the lease. The company leases office space and data processing equipment under non-cancellable leases expiring in various years through 2018 to 2021. Several of the leases have renewal options with various terms and rental rate adjustments.

(f) Accounting standards and amendments issued but not yet effective
At the date of authorisation of the financial report, the following AASB Standards and amendments were issued but not yet effective and have not been applied in preparing the company’s financial statements. Assessment of the impact of the initial application of the following Standards and Interpretations is still to be completed:

<table>
<thead>
<tr>
<th>Standard</th>
<th>Effective for annual reporting periods beginning on or after</th>
<th>Expected to be initially applied in the financial year ending</th>
</tr>
</thead>
<tbody>
<tr>
<td>AASB 2018-7 ‘Amendments - Definition of Material’</td>
<td>1 January 2020</td>
<td>31 December 2020</td>
</tr>
<tr>
<td>AASB 9 ‘Financial Instruments’ and the relevant amending standards</td>
<td>1 January 2021</td>
<td>31 December 2021</td>
</tr>
<tr>
<td>AASB 17 ‘Insurance Contracts’</td>
<td>1 January 2021</td>
<td>31 December 2021</td>
</tr>
</tbody>
</table>

The company expects to adopt these standards where applicable for the annual reporting periods beginning on or after the operative dates set out above.

AASB 9 ‘Financial Instruments’
AASB 9 was issued during 2014 and replaces existing accounting requirements for financial instruments. Accounting standards currently permit deferral of adoption of AASB 9 to 1 January 2021; however, the International Accounting Standards Board has tentatively decided to extend this to 1 January 2022.

The company has elected to apply this temporary exemption as it meets the following relevant criteria:
- the carrying amount of the company’s insurance liabilities within the scope of AASB 1023 (being outstanding claims, unearned premiums and unexpired risk liability) exceed 80% of the carrying amount of the company’s total liabilities; and
- the company does not engage in any significant activity unconnected with insurance, on the basis that its business is almost exclusively in the nature of issuing reinsurance protection and deriving a return from the investment of insurance premiums.
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

1 SUMMARY OF ACCOUNTING POLICIES (continued)

(t) Accounting standards and amendments issued but not yet effective (continued)
The following information is provided to assist users in comparing the company’s financial statements with entities which have adopted AASB 9:

Impact on financial assets
The company’s investments are currently designated as fair value through profit or loss on initial recognition and are subsequently remeasured to fair value at each reporting date, reflecting the company’s business model for managing and evaluating the investment portfolio. Adoption of AASB 9 does not result in any changes to accounting for these investments.

Financial assets within the scope of AASB 1023, such as premiums receivable and reinsurance and other recoveries on paid claims, which together form the majority of the carrying value of the company’s trade and other receivables, as well as reinsurance recoverable are outside the scope of AASB 9 and are unaffected by the new requirements. Trade and other receivables also includes other financial assets with a relatively small carrying value which are measured at amortised cost, all of which are receivable within 12 months. The application of AASB 9 will not materially impact these balances.

Impact on financial liabilities
Financial liabilities within the scope of AASB 1023, such as outstanding claims, unearned premiums and unexpired risk liability, are outside the scope of AASB 9 and are therefore unaffected by the new requirements. Trade and other payables also includes other financial liabilities measured at amortised cost arising from the company’s activities, the accounting for which is materially unchanged by AASB 9.

AASB 17 ‘Insurance Contracts’
In July 2017, the AASB issued AASB 17 Insurance Contracts (AASB 17), a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, AASB 17 will replace AASB 4 Insurance Contracts, AASB 1023 General Insurance Contracts and AASB 1038 Life Insurance Contracts. AASB 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply. The overall objective of AASB 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. The core of AASB 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach).
- A simplified approach (the premium allocation approach) mainly for short-duration contracts.

AASB 17 is effective for reporting periods beginning on or after 1 January 2021, with comparative figures required. Early application is permitted, provided the entity also applies AASB 9 on or before the date it first applies AASB 17. The IASB and AASB have issued exposure drafts proposing a deferral of the effective date of AASB 17 to be effective for annual reporting periods beginning on or after 1 January 2022. The company is currently determining the transition approach which will be applied for AASB 17, and the ongoing impact of adopting this standard is being assessed.

(u) Accounting standards and amendments adopted in the current year

AASB 16 ‘Leases’
AASB 16 supersedes AASB 117 Leases, AASB Interpretation 4 Determining whether an Arrangement contains a Lease, AASB Interpretation-115 Operating Leases-Incentives and AASB Interpretation 127 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessessees to recognise most leases on the balance sheet.

Lessor accounting under AASB 16 is substantially unchanged under AASB 117. Lessors will continue to classify leases as either operating or finance leases using similar principles as in AASB 117.

The company adopted AASB 16 using the modified retrospective method of adoption with the date of initial application of 1 January 2019. Under this method, the standard is applied retrospectively with the cumulative effect of initially applying the standard recognised at the date of initial application. The company elected to use the transition practical expedient allowing the standard to be applied only to contracts that were previously identified as leases applying AASB 117 and AASB Interpretation 4 at the date of initial application. The company also elected to use the recognition exemptions for lease contracts that, at the commencement date, have a lease term of 12 months or less and do not contain a purchase option, and lease contracts for which the underlying asset is of low value.

The difference between the operating lease commitments disclosed by applying AASB 117 and the lease liability recognised in the statement of financial position as the date of initial application is shown below. The difference arises due to the requirement of paragraph 18 of AASB 16 Leases to include lease options with the lease term. The company has two, three year lease options which on the balance of probabilities would be renewed. The weighted average incremental borrowing rate applied to the lease liability from initial recognition is 6.54%.

NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

2 CRITICAL ACCOUNTING JUDGEMENTS AND ESTIMATES

The company makes estimates and assumptions in respect of certain key assets and liabilities. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The key areas in which critical estimates are applied are described below.

All the company’s assets are available to support the company’s reinsurance liabilities, with the exception of reinsurance funds held under retrocession arrangements.

The ultimate liability arising from claims made under insurance contracts

Provision is made at the year-end for the estimated cost of claims incurred but not settled at the balance date, including the cost of claims incurred but not yet reported (‘IBNR’) to the company.

The estimated cost of claims includes direct expenses to be incurred in settling the claims gross of the expected value of salvage and other recoveries. The company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established.

The estimation of IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the company, where more information about the claim event is generally available. IBNR claims may often not be apparent to the insured until many years after the events giving rise to the claims have happened. Allowance is made, however, for changes or uncertainties which may create distortions in the underlying statistics or which might cause the cost of unsettled claims to increase or reduce when compared with the cost of previously settled claims including:

- Changes in company processes which might accelerate or slow down the development and/or recording of paid or incurred claims, compared with the statistics from previous periods
- Changes in the legal environment
- The effects of inflation
- Changes in the mix of business
- The impact of large losses
- Movements in industry benchmarks
- Medical and technological developments.

A component of these estimation techniques is usually the estimation of the cost of notified but unpaid claims. In estimating the cost of these, the company has regard to the claim circumstance as reported, and information about the cost of settling claims with similar characteristics in previous periods.

Large claims impacting each relevant business class are generally assessed separately, being measured on a case by case basis or projected separately in order to allow for the possible distortive effect of the development and incidence of these large claims.

Provisions are calculated gross of any reinsurance recoveries. A separate estimate is made of the amounts that will be recoverable from reinsurers based upon the gross provisions. Details of the specific assumptions used in deriving the liability for outstanding claims liability at year end are detailed in Note 3.

Assets from reinsurance contracts

Assets arising from reinsurance contracts are also computed using the above methods. In addition, the recoverability of these assets is assessed on a periodic basis to ensure the balance is reflective of the amounts that will ultimately be recovered.

Determining the lease term of contracts with renewal and termination options

The company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The company has several lease contracts that include extension and termination options. The company applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate.
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

2  CRITICAL ACCOUNTING JUDGEMENTS AND ESTIMATES (continued)

Leases - Estimating the incremental borrowing rate

The company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the company ‘would have to pay’, which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The company estimates the IBR using observable inputs when available and is required to make certain entity-specific estimates.

3  ACTUARIAL ASSUMPTIONS AND METHODS

The company writes Facultative and Treaty (both proportional and non-proportional) reinsurance covers for Property and Casualty lines of business, and Treaty Marine business.

The Appointed Actuary is Nina Xiao, Fellow of the Institute and Faculty of Actuaries and Fellow of the Institute of Actuaries of Australia. The Appointed Actuary is satisfied as to the nature, sufficiency and accuracy of the data upon which policy liabilities have been determined.

Weighted average reporting time

This is not a reserving assumption, but it does provide an indication of the speed at which claims are assumed to be reported. For the company’s major categories of business, weighted by expected ultimate premiums for the underwriting year, these were (in years):

<table>
<thead>
<tr>
<th>Category</th>
<th>2019</th>
<th>Restated</th>
</tr>
</thead>
<tbody>
<tr>
<td>Proportional, Property &amp; Marine:</td>
<td>1.34</td>
<td>1.17</td>
</tr>
<tr>
<td>Proportional, Casualty:</td>
<td>2.75</td>
<td>2.79</td>
</tr>
<tr>
<td>Non-proportional, Property &amp; Marine:</td>
<td>1.04</td>
<td>1.05</td>
</tr>
<tr>
<td>Non-proportional, Casualty:</td>
<td>4.86</td>
<td>4.76</td>
</tr>
</tbody>
</table>

Run-off loss ratios

These were selected having regard to emerging experience for older underwriting years and to the pricing levels and conditions achieved in more recent underwriting years (where experience to date may not yet be sufficiently reliable, particularly for long-tailed lines of business).

Expense rate

A 1% loading for claims handling expenses is supported by analysis of the current level of the branch’s Claims department expenses applied to the reserves and duration of unpaid liabilities.

Discount rate

The discount rates were based on market yields on Australian Government securities as at balance date and varied according to the expected year of payment of the claims liabilities. The weighted average discount rate on a gross basis was 1.31% (2018: 2.19%).

Inflation

The methodology for calculation of IBNR reserves allows implicitly for claims inflation, and case reserves are set based upon expected ultimate settlement values (i.e. incorporating claims inflation as appropriate).
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

3 ACTUARIAL ASSUMPTIONS AND METHODS (continued)

Sensitivity analysis

The sensitivity of the company’s profit and equity to key valuation assumptions is tabulated below:

<table>
<thead>
<tr>
<th>Variable</th>
<th>Movement in variable</th>
<th>Underwriting profit before retrocessions $'000</th>
<th>Net Profit $'000</th>
<th>Equity $'000</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Risk margin

There are many sources of uncertainty as to the eventual values of outstanding claims, including but not restricted to: quality of data used in the valuation; appropriateness of the valuation model and assumptions; impact of past legislative reform; future legislative changes; and future economic and environmental factors. A risk margin increases the company’s reserves to a level that is intended to have a 75% probability of adequacy. The assumptions regarding uncertainty for each line of business were applied to the central estimates, and the results were aggregated, allowing for diversification between different lines of business. The risk margins applied to the company’s major categories of business were:

<table>

4 RISK MANAGEMENT POLICIES AND PROCEDURES

Insurance contracts – Risk management policies and procedures

The financial condition and operation of the company are affected by a number of key risks including insurance risk, interest rate risk, currency risk, credit risk, market risk, liquidity risk, financial risk, compliance risk, fiscal risk and operational risk. Notes on the company’s policies and procedures in respect of managing these risks are set out in this note.

Objectives in managing risks arising from insurance contracts and policies for mitigating those risks

The company has an objective to control insurance risk thus minimizing substantial unexpected losses that would expose the company to a loss of capital.

In accordance with Prudential Standards CPS 220 Risk Management and GPS 230 Reinsurance Management issued by the Australian Prudential Regulation Authority (APRA), the Board and senior management of the company have developed, implemented and maintain a sound and prudent Risk Management Strategy (RMS), Risk Appetite Statement (RAS) and a Reinsurance Management Strategy (REMS).

The Internal Capital Adequacy Assessment Process (ICAAP) Summary Statement is reviewed on an annual basis, unless circumstances necessitate a more frequent review.

The ICAAP Summary Statement, RMS and REMS identify the company’s policies and procedures, processes and controls that comprise its risk management and control systems. These systems address all material risks, financial and non-financial, likely to be faced by the company. Annually, the Board certifies to APRA that adequate strategies have been put in place to monitor those risks, that the company has systems in place to ensure compliance with legislative and prudential requirements and that the Board has satisfied itself as to compliance with the RMS and REMS.
OBJECTIVES IN MANAGING RISKS ARISING FROM INSURANCE CONTRACTS AND POLICIES FOR MITIGATING THOSE RISKS (CONTINUED)

The ICAAP, RMS and REMS have been approved by the Board. Key aspects of the processes established in the RMS to mitigate risks include:

- The maintenance and use of sophisticated management information systems, which provide up to date, reliable data on the risks to which the business is exposed at any point in time.
- Actuarial models, using information from the management information systems, are used to calculate premiums and monitor claims patterns. Past experience and statistical methods are used as part of the process.
- Documented procedures are followed for underwriting and accepting reinsurance risks.
- Reinsurance is used to limit the company’s exposure to large single claims and catastrophes.
- The company’s investment portfolio is prudently managed with respect to key criteria such as the average duration and credit quality.
- The mix of assets in which the company invests is driven by the nature and term of insurance liabilities. The management of assets and liabilities is closely monitored to attempt to match the maturity dates of assets with the expected pattern of claim payments.
- The diversification of business over classes within the reinsurance portfolio, separate geographical segments and large numbers of uncorrelated individual risks also reduce variability in loss experience.

FINANCIAL RISKS

Financial risks are controlled by the majority of investments being in government bonds in the same currency as the underlying policy liabilities, the balance of investments being held in cash assets. This significantly reduces any interest rate, currency, credit and liquidity risk that the company may incur.

(a) Interest rate risk

Fixed interest rate instruments expose the company to fair value interest rate risk. The company’s risk management approach is to minimise interest rate risk by actively managing investment portfolios. The company invests in high quality, liquid interest-bearing bonds and cash and actively manages the duration of the fixed interest portfolio. The claims provision is discounted to present value by reference to risk-free interest rates therefore exposed to potential underwriting result volatility as a result of interest rate movements. In practice, however, an increase or decrease in interest rates is normally offset by a corresponding increase or decrease in inflation. Reinsurance contracts are entered into annually. At the time of entering into the contract, all terms and conditions are negotiable or, in the case of renewals, terms are renegotiable.

(b) Credit risk

Financial assets or liabilities arising from insurance and reinsurance contracts are stated in the Statement of Financial Position at the amount that best represents the maximum credit risk exposure at balance date. There are no significant concentrations of credit risk.

(c) Terms and conditions of reinsurance business

The terms and conditions attaching to reinsurance contracts affect the level of insurance risk accepted by the company. All reinsurance contracts are subject to pre-determined capacity limits and underwriting guidelines and authorities. There are no special terms and conditions in any non-standard contracts that have a material impact on the financial statements. Reinsurance contracts written in Australia and New Zealand are subject to substantially the same terms and conditions.

(d) Concentration of insurance risk

The company’s exposure to concentrations of insurance risk is mitigated by a portfolio diversified into two major classes of business (Treaty and Facultative) written out of Australia and New Zealand. The portfolio is controlled and monitored through the company’s Risk Management Strategy and Framework. This includes identifying and mitigating the concentrations of insurance risk by reviewing the type of insured event and also the geographical area of the risk.
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

4 RISK MANAGEMENT POLICIES AND PROCEDURES (continued)

Objectives in managing risks arising from insurance contracts and policies for mitigating those risks (continued)

Non-financial risks
Non-financial risks are controlled through the use of:

i) medical and non-medical underwriting procedures and authorities
ii) claims management procedures and authorities
iii) product development/review procedures and authorities
iv) treaty underwriting procedures and authorities
v) underwriting and claim peer reviews of clients
vi) charging adequate premium rates for the business
vii) quarterly monitoring of profitability overall and by client
viii) reinsurance agreement terms and conditions
ix) non-guaranteed reinsurance rates
x) retrocession arrangements to limit the effect of adverse claims experience

NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

6 INCOME TAX

(a) Income tax expense

<table>
<thead>
<tr>
<th>Description</th>
<th>2019</th>
<th>2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current tax expense that relates to current year</td>
<td>(11,850)</td>
<td>(1,411)</td>
</tr>
<tr>
<td>Current tax relating to prior years’ over provision</td>
<td>174</td>
<td>-</td>
</tr>
<tr>
<td>Deferred tax relating to temporary differences in current year</td>
<td>385</td>
<td>1,578</td>
</tr>
<tr>
<td>Deferred tax relating to prior years’ over provision</td>
<td>40</td>
<td>-</td>
</tr>
<tr>
<td><strong>Total income tax (expense)/benefit relating to gain from ordinary activities</strong></td>
<td><strong>(11,251)</strong></td>
<td><strong>167</strong></td>
</tr>
</tbody>
</table>

The prima facie income tax expense on the pre-tax accounting profit reconciles to the income tax expense shown in the Statement of Profit or Loss and Other Comprehensive Income, as follows:

<table>
<thead>
<tr>
<th>Description</th>
<th>2019</th>
<th>2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Profit before income tax</td>
<td>38,340</td>
<td>276</td>
</tr>
<tr>
<td>Income tax expense calculated at 30% (2018: 30%) of operating profit</td>
<td>(11,502)</td>
<td>(83)</td>
</tr>
<tr>
<td>Adjustment for Permanent differences:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>- Non-deductible entertainment expense</td>
<td>(7)</td>
<td>(8)</td>
</tr>
<tr>
<td>- New Zealand tax rate differential</td>
<td>31</td>
<td>37</td>
</tr>
<tr>
<td>Prior year over provision</td>
<td>214</td>
<td>257</td>
</tr>
<tr>
<td>Foreign exchange differences on New Zealand branch profits</td>
<td>13</td>
<td>(36)</td>
</tr>
<tr>
<td><strong>Total income tax (expense)/benefit</strong></td>
<td><strong>(11,251)</strong></td>
<td><strong>167</strong></td>
</tr>
</tbody>
</table>

(b) Deferred tax

At 31 December the net deferred tax asset comprises:

<table>
<thead>
<tr>
<th>Description</th>
<th>2019 $’000</th>
<th>2018 $’000</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Timing differences</strong></td>
<td>5,675</td>
<td>5,192</td>
</tr>
</tbody>
</table>

The tax balances and reconciliation above are based on the current corporate tax rates of 30% (2018: 30%) applicable in Australia and 28% (2018: 28%) in New Zealand on taxable profits under Australian and New Zealand Income Tax Law respectively.

The Directors have recognised a deferred tax asset on the basis of forecasts showing that there will be taxable profits in the future for these to be utilised against.

General Reinsurance Australia Ltd. purchased losses of $4,615,000 from General Reinsurance Life Australia Ltd., and the company will reimburse the tax value thereof (2018: $4,445,690).

During the financial period, no losses were purchased by General Reinsurance Life Australia Ltd. - New Zealand Branch from General Reinsurance Australia Ltd. - New Zealand Branch (2018: NIL).
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

6 INCOME TAX (continued)

(c) Franking account

<table>
<thead>
<tr>
<th></th>
<th>2019</th>
<th>2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Franking credits available for the subsequent financial year</td>
<td>121,285</td>
<td>108,485</td>
</tr>
</tbody>
</table>

During the period, no dividend was declared or paid relating to the 2019 financial period (paid in 2018: $100,000,000 for the 2017 financial period). The ability to utilise the franking account credits is dependent on there being sufficient available profits to declare a dividend. The franking account represents amounts on an income tax paid basis.

At formation of the MEC group disclosed in note 1, the franking account balance of the joining entity, General Reinsurance Life Australia Ltd ($28,248,000) was transferred to the company.

NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

13 INVESTMENTS

Insurance activities, at fair value:
Fixed interest securities
Of which is held as reinsurance collateral from General Reinsurance Corporation

14 CURRENT TAX ASSET

The current tax asset relates to PAYG income tax instalments made on behalf of the MEC Group. The income tax instalments are determined based on the prior year income tax return lodged. Instalments were paid with the expectation of profits resulting in a taxable income.

15 OUTSTANDING CLAIMS AND UNEARNED PREMIUMS

Outstanding claims
Gross outstanding claims 383,438 362,717
Discount to present value (16,935) (25,394)
Risk margin 41,892 39,029

Liability for outstanding claims 408,395 376,352

Reconciliation of outstanding claims

24 FINANCIAL INSTRUMENTS

(a) Credit Risk Exposure

Financial assets or liabilities arising from insurance and reinsurance contracts are stated in the Statement of Financial Position at the amount that best represents the maximum credit risk exposure at balance date. There are no significant concentrations of credit risk, except for related party transactions.

(b) Interest Rate Risk

The company’s exposure to interest rate risk is managed through adjustments to the investment portfolio. The company’s exposure to interest rate risk and the effective weighted average interest rate for each class of financial assets and liabilities is set out below in section (j).

(c) Net fair value of financial assets and liabilities

The net fair value of cash and cash equivalents and non-interest bearing monetary financial assets and financial liabilities of the company approximates to their carrying value. The net fair value of other monetary financial assets and financial liabilities is based upon market prices.

(d) Significant accounting policies

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which revenues and expenses are recognised, in respect of each class of financial asset, financial liability are disclosed in note 1 of the financial statements.

(e) Capital risk management

The company manages its capital to ensure that on a legal entity level it meets regulatory solvency requirements and it will continue operating as a going concern.

The capital structure of the company consists of cash and cash equivalents (as disclosed in Note 7) and equity, comprising issued capital and retained earnings (as disclosed in the Statement of Changes in Equity).

The company’s capital is managed through its ICAAP. The ICAAP is reviewed internally on an annual basis. Independent reviews are performed every three years.

(i) Financial assets carried at fair value through profit or loss have been designated as such upon initial recognition. None of the receivables are designated as 'fair value through profit or loss'.

(g) Financial risk management objectives

It is ultimately the responsibility of the Board to ensure that there is an effective risk management control framework in place. Consistent with regulatory requirements the board has explicitly allocated to the Managing Director, the function of overseeing the establishment and maintenance of risk-based systems and controls across the company. The Chief Risk Officer (CRO) is to review, monitor and report on the RMS to the Managing Director.

As part of the overall governance framework the Board and senior management of the company have developed, implemented and maintain a sound and prudent RMS and a REMS. The RMS and REMS identify the company’s policies and procedures, processes and controls that comprise its risk management and control systems. These systems address all material risks, financial and non-financial, likely to be faced by the company. Annually, the Board certifies to APRA that adequate strategies have been put in place to monitor those risks, that the company has systems in place to ensure compliance with legislative and prudential requirements and that the Board has satisfied itself as to compliance with the RMS and REMS.

(h) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the company. The company has adopted the policy of only dealing with creditworthy cedants and bondholders as a means of mitigating the risk of financial loss from defaults. The company's overall strategy in respect of credit risk management remains unchanged from 2018.

(i) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting its obligations under the reinsurance contracts it has entered into. Ultimate responsibility for liquidity risk management rests with the Board of directors, which has implemented appropriate liquidity risk management framework for the management of the company’s short, medium and long-term funding and liquidity management requirements. The company manages liquidity risk by maintaining appropriate levels of financial assets that are readily realisable and by continuously monitoring forecast and actual cash flows in order to match the maturity profiles of assets and liabilities. As required by APRA Prudential Standard CPS 220, the company has developed and implemented a Risk Management Strategy. The company's overall strategy in liquidity risk management remains unchanged from 2018.

Total 58,464 625 1,045 60,134

(j) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: foreign exchange (currency risk), market interest rates (interest rate risk) and market prices (price risk). The company has put in place policies and procedures to mitigate its exposure to market risk. There has been no change to the company's exposure to the different elements of market risk or the manner in which it manages and measures these risks.
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

24 FINANCIAL INSTRUMENTS (continued)

Interest rate risk management
The company’s activities expose it to the financial risk of changes in interest rates. Fixed interest rate instruments expose the company to interest rate risk. The company’s Investment Manager closely monitors the company’s exposures to interest rate risk.

The company’s exposures to interest rates on financial liabilities are detailed in the liquidity risk section of this note.

NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

24 FINANCIAL INSTRUMENTS (continued)

Foreign currency risk management
Foreign currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The company is mainly exposed to fluctuations in the New Zealand dollar (NZD) exchange rate through its branch in New Zealand. The company’s financial assets are primarily denominated in the same currencies as its reinsurance contract liabilities, which mitigates the foreign currency exchange risk for the overseas operations in New Zealand. The company’s overall strategy in respect of foreign currency risk management remains unchanged from 2018.

The carrying amount of the company’s foreign currency denominated monetary assets and monetary liabilities in Australian dollars at the reporting date is as follows:

<table>
<thead>
<tr>
<th></th>
<th>2019 $’000</th>
<th>2018 $’000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net Liabilities</td>
<td></td>
<td></td>
</tr>
<tr>
<td>New Zealand dollar</td>
<td>12,911</td>
<td>(6,091)</td>
</tr>
<tr>
<td>Japanese Yen</td>
<td>(17,511)</td>
<td>(384)</td>
</tr>
</tbody>
</table>

Foreign currency sensitivity
The following table details the company’s sensitivity to a 10% increase and decrease in the Australian dollar against the relevant foreign currencies. 10% is the sensitivity rate used when reporting foreign currency risk internally to management and represents their assessment of the possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign exchange rates. The sensitivity analysis includes external loans as well as loans to foreign operations within the company where the denomination of the loan is in a currency other than the currency of the lender or the borrower. A positive number indicates an increase in profit or loss and other equity when the Australian dollar strengthens against the respective currency.

</table>

Fair value of financial instruments
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. Fair value measurements assume the asset or liability is exchanged in an orderly manner; that the exchange is in the principal market for that asset or liability (or in the most advantageous market when no principal market exists); and the market participants are independent, knowledgeable, able and willing to transact an exchange. Non-performance risk (credit risk) is considered in valuing liabilities. The carrying value of the company’s cash and cash equivalents, receivables, other assets, all insurance related balances and accounts payable, accruals and other liabilities are deemed to be reasonable estimates of their fair value.

Investments
The estimated fair values for fixed maturity securities were generally based on quoted market prices or estimated from independent pricing services. Where quoted market prices are not available, fair values are estimated using present value or valuation techniques. Considerable judgment may be required in interpreting market data used to develop the estimates for fair value. As a result the estimated fair values presented may not be representative of the actual amount that could be realised in a current market transaction. The use of different market assumptions and models may have a material effect on the estimated fair values. The fair value of investments on the Statement of Financial Position was determined by reviewing available financial information of the investee and by performing other financial analyses in consultation with external advisors.
NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

24 FINANCIAL INSTRUMENTS (continued)

Investments (continued)
A framework exists for measuring fair values using a hierarchy for observable independent market inputs and unobservable market assumptions. The hierarchy consists of three levels, ranging from the category deemed to be most reliable to a category where fair value is measured using significant unobservable inputs because of the lack of observable market prices for the instrument, or Levels 1 through 3, respectively. A description of the inputs used in the valuation of assets and liabilities under the three levels follows:
- Level 1 – Inputs represent unadjusted quoted prices for identical assets or liabilities exchanged in active markets.
- Level 2 – Inputs include directly or indirectly observable inputs other than Level 1 inputs such as quoted prices for similar assets prices for similar assets or liabilities exchanged in active or inactive markets; quoted prices for identical assets or liabilities exchanged in inactive markets; other inputs that are considered in fair value determinations of the assets or liabilities, such as interest rates and yield curves that are observable at commonly quoted intervals; volatilities, prepayment speeds, loss severities, credit risks and default rates and inputs that are derived principally from or corroborated by observable market data by correlation or other means. Fair values for the company’s investments in fixed maturity securities are primarily based on market prices and market data available for instruments with similar characteristics since active markets are not common for many instruments. Pricing evaluations are based on yield curves for instruments with similar characteristics such as credit rating, estimated duration and yields for other instruments of the issuer or entities in the same industry sector.
- Level 3 – Inputs include unobservable inputs used in the measurement of assets and liabilities. Management is required to use its own assumptions regarding unobservable inputs because there is little, if any, market activity in the assets or liabilities or related observable inputs that can be corroborated at the measurement date. Measurements of non-exchange traded derivative contracts and certain other investments carried at fair value are based primarily on valuation models, discounted cash flow models or other valuation techniques that are believed to be used by market participants. Unobservable inputs require management to make certain projections and assumptions about the information that would be used by market participants in pricing assets or liabilities.

Financial assets and liabilities
Financial assets and liabilities measured at fair value in the financial statements as at 31 December 2019 and 2018 are summarised in the following table by the type of inputs applicable to the level of the fair value measurement (in thousands).

<table>
<thead>
<tr>
<th></th>

NOTES TO THE FINANCIAL REPORT
FOR THE YEAR ENDED 31 DECEMBER 2019

27 LIABILITY ADEQUACY TEST

The liability adequacy test (LAT) is used to assess the sufficiency of the unearned premium liability to cover all expected future cash flows relating to future claims against in-force insurance contracts. If the unearned premium liability less related deferred acquisition costs exceeds the present value (PV) of expected future cash flows plus additional risk margin then the unearned premium liability is deemed to be adequate. The LAT is carried out on each portfolio of contracts in line with APRA's reporting categories, which each cover broadly similar risks. The following table details the value of the expected future income/expenditure items arising from in-force contracts:

<table>
<thead>
<tr>
<th></th>
<th>2019 $'000</th>

28 Reconciliation of US-GAAP balances to Australian IFRS (A-IFRS)

In accordance with US Accounting Standard SSAP 97 (Investments in Subsidiary, Controlled, and Affiliated Entities), a reconciliation is required between US-GAAP accounting results and those required in the local jurisdiction. The information below reconciles the company’s results after tax and net assets based on A-IFRS to the US-GAAP accounting results.

The company operates as a for profit unlisted public company.

30 EVENTS SUBSEQUENT TO BALANCE DATE

There were no events subsequent to balance date requiring disclosure.
DIRECTORS' DECLARATION

The Directors declare that:

(a) in the Directors' opinion, there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.

(b) in the Directors' opinion, the attached financial statements and notes thereto are prepared in accordance with the Corporations Act 2001, including compliance with accounting standards and giving a true and fair view of the financial position and the performance of the entity.

(c) in the Directors' opinion, the financial statements and notes thereto are prepared in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board.

Signed in accordance with a resolution of the Directors made pursuant to Section 295(5) of the Corporations Act 2001 on 17 March 2020.

On behalf of the directors:

K. J. McCann
Chair
Sydney, 17 March 2020

N. Mullen
Managing Director
Independent Auditor’s Report to the Members of General Reinsurance Australia Ltd.

Opinion

We have audited the financial report of General Reinsurance Australia Ltd. (the “Company”) which comprises the statement of financial position as at 31 December 2019, the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the directors’ declaration.

In our opinion, the accompanying financial report of General Reinsurance Australia Ltd. is in accordance with the Corporations Act 2001, including:

(i) giving a true and fair view of the company’s financial position as at 31 December 2019 and of its financial performance for the year then ended; and

(ii) complying with Australian Accounting Standards and the Corporations Regulations 2001.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Report section of our report. We are independent of the company in accordance with the auditor independence requirements of the Corporations Act 2001 and the ethical requirements of the Accounting Professional and Ethical Standards Board’s APES 110 Code of Ethics for Professional Accountants (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the Corporations Act 2001, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor’s report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the Director’s report for the year ended 31 December 2019, but does not include the financial report and our auditor’s report thereon.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001 and for such internal control as the directors determine is necessary to enable the preparation of
the financial report that gives a true and fair view and is free from material misstatement, whether
due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the
company to continue as a going concern, disclosing, as applicable, matters related to going concern
and using the going concern basis of accounting unless the directors either intend to liquidate the
company or to cease operations, or has no realistic alternative but to do so.

Auditor’s Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is
free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that
includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that
an audit conducted in accordance with the Australian Auditing Standards will always detect a material
misstatement when it exists. Misstatements can arise from fraud or error and are considered
material if, individually or in the aggregate, they could reasonably be expected to influence the
economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional
judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due
to fraud or error, design and perform audit procedures responsive to those risks, and obtain
audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk
of not detecting a material misstatement resulting from fraud is higher than for one resulting
from error, as fraud may involve collusion, forgery, intentional omissions,
misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit
procedures that are appropriate in the circumstances, but not for the purpose of expressing
an opinion on the effectiveness of the company’s internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of
accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the directors’ use of the going concern basis of
accounting and, based on the audit evidence obtained, whether a material uncertainty exists
related to events or conditions that may cast significant doubt on the company’s ability to
continue as a going concern. If we conclude that a material uncertainty exists, we are
required to draw attention in our auditor’s report to the related disclosures in the financial
report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are
based on the audit evidence obtained up to the date of our auditor’s report. However, future
events or conditions may cause the company’s to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial report, including the
disclosures, and whether the financial report represents the underlying transactions and
events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing
of the audit and significant audit findings, including any significant deficiencies in internal control
that we identify during our audit.
